

# SUPERHEAT™ SMART FURNACE

## PROCESS HIGHLIGHT

### MINIMIZE RISKS

A web based QA process eliminates contractor footprint on-site

### IMPROVE QUALITY

Centralized document control hub for lifetime QA Package retrieval

### REDUCE COSTS

Up to 40% labor cost savings on per use billing

### SAVE TIME

Zero contractor wait time on furnace loads

- Introducing the **Superheat SmartFurnace™**: The most advanced and adaptable furnace for your immediate heat treatment needs.
- **Superheat SmartPak™** provides real time temperature readings at the workpiece, while near field communication via the **Superheat SmartCard™** lends safety lock out capabilities.
- Take the guess work out of heat treatment timelines by viewing real time weld statuses and live charts through **Superheat SmartView™**. At the completion of the cycle download **Superheat SmartReport™** QA packages directly from **Superheat SmartView™**. You will never have to wait on a contractor to deliver your information again.

### Improve Quality

- API (American Petroleum Institute) est. 1919
- API Spec 16A: Qualification of Heat-treating Equipment

**Size Specifications:** 6'L x 4.5'W x 4.3'H

### Power Requirements

INCOMING SUPPLY	
VOLTS	AMPS
480VΔ or 600VΔ	60 OR 100*

\* Dependant on console used

\* Vendor supplied power also available

## BETTER SAFER FASTER™

### ADVANCING HEAT TREATMENT™
